**THE APPLIANCE IS SEALED AND CONTAINS FLUORINATED GREENHOUSE GASES GOVERNED BY THE KYOTO PROTOCOL. THE "GWP" IS SET OUT IN THE "TECHNICAL DATA TABLE".**

**IMPORTANT: BEFORE ANY MAINTENANCE, CLEANING, REPAIR OR OTHER, ALWAYS DISCONNECT THE PLUG FROM THE POWER MAINS. BEFORE RESTARTING THE DEHUMIDIFIER, ENSURE THE ELECTRICAL PARTS ARE NOT MOIST AND/OR WET.**

**►►1. SAFETY WARNINGS**

The dehumidifier must always be connected to power sockets fitted with earthing connection. Failure to comply with this rule - as for all electrical appliances - is a source of danger, for the consequences of which the manufacturer disclaims all liability.

The appliance may be disassembled exclusively by a skilled technician.

When the appliance is connected to a power socket it must be kept in vertical position and must not be subject to violent movements. Any water escaping from the tank might come in contact with electrical parts, with obvious hazardous consequences. It is therefore indispensable to disconnect the plug before moving the dehumidifier and empty the tank before lifting it.

In the event a water spillage should occur as a consequence of sudden motions, the dehumidifier must remain still in vertical position for at least eight hours before being switched on again.

This dehumidifier sucks air in from the front and expels it through the rear grille; therefore the front panel, which holds the air filter, must be kept at a distance of at least fifteen centimeters from the walls. Furthermore, the appliance must not be operated in narrow spaces which do not allow circulation of the air flowing out of the rear grille into the environment. However, the side panels may be drawn close to walls without creating any hindrance to regular operation. This dehumidifier has been constructed in compliance with the strictest safety regulations. However, no sharp objects such as screwdrivers, knitting irons or similar must be inserted in the grille or in the opening that remains exposed in the front panel when the filter is extracted: this is dangerous for persons and may damage the appliance.

To clean it outside you may use a moistened cloth after disconnecting the power plug from the electricity mains. Do not cover the front grille with linen or other objects, the alliance gets damaged and may cause danger.

Regularly clean the filter: cleaning must be performed on average every month; in the event of use in very dusty environments cleaning must be more frequent. See the relevant chapter for cleaning methods. When the filter is dirty the expelled air is warmer than usual, damaging the appliance and affecting performance.

**►►2. DESCRIPTION OF THE DEHUMIDIFIER**

All portable dehumidifiers use the cooling cycle with compressor. The appliances are described below.

**►►3. ASSEMBLY OF THE DEHUMIDIFIER**

This appliance is equipped with a handle. This component

is contained within the packaging of the dehumidifier.

To install the handle follow the below steps (Fig. 1-2):

- 3.1.Remove the screw that secure the cover to the dehumidifier (1);
- 3.2.Rotate the cover (2);
- 3.3.Remove the four screws located on the appliance side, two on the left side and two on the right side (3);
- 3.4.Place the handle in the proper position (4);
- 3.5.Install the four screws in their proper position, two on the left side and two on the right side (5);
- 3.6.Rotate the cover to bring it back to a vertical position (6);
- 3.7.Install the screw than secures the cover to the dehumidifier (7).

**►►4. OPERATION**

This dehumidifier is a cooling cycle appliance whose operation is based on the physical principle by which when air comes into contact with a cold surface it wets it releasing moisture in the form of drops of condensation or ice, when the ambient temperature is not high.

In practice, a finned coil is maintained cold by a refrigerating machine, and the air that goes through it cools and dehumidifies. After that, the air goes through a heat exchanger and is heated, to finally flow back into the room dehumidified and at a slightly higher temperature than the initial one.

Reference to drawing (Fig. 3):

Air is extracted through the front of the dehumidifier: it goes through the filter (1), the fan (2), the cold exchanger (evaporator) (3), the hot exchanger (condenser) (4) and finally the dehumidified air flows out and is recirculated into the room through the rear grille. The condensed water is collected in the tank (5). A microswitch (6) stops the appliance when water in the tank reaches a certain level. The humidistat (7) allows the dehumidifier to operate when the humidity in the room is higher than the desired level. An electronic board (8) controls defrosting and prevents the compressor (9) from starting up too often, which is detrimental, and delays it.

These machines are fitted with a hot gas defrosting device, they are therefore equipped with a solenoid valve for hot gas bypass, a special electronic board and a defrosting thermostat.

The operation of the defrosting system is exclusive to our products: in practice a system with a thermostat and electronic control, it uses the hot gas bypass only for the time strictly necessary. This extends the dehumidifier's life and reduces the hot gas operation stage.

**►►5. CONTROL PANEL**

The control panel (Fig. 4) is located at the rear of the dehumidifier and includes:

- 5.1.HUMIDISTAT (1): The humidistat carries a scale from 1 to 5. Setting the humidistat at the minimum value (1) means the dehumidifier operates until 80% relative humidity is achieved in the room. Setting the humidistat at the maximum value (5) means the dehumidifier operates until 20% relative humidity is achieved in the room. In the "CONT" position the dehumidifier works all the time regardless of the relative humidity reading. In the "OFF" position the dehumidifier never starts (unipolar switch).
- 5.2.HOUR COUNTER (2): The hour counter indicates the number of hours of operation of the dehumidifier.
- 5.3.VENTILATION SPEED SELECTOR (3): The ventilation speed selector allows the dehumidifier to

work at the maximum air flow or at an intermediate air flow depending on the need.

- 5.4. ALARM LIGHT (4): The alarm light lights up when, in case of dehumidifier with tank, the tank is full or the direct exhaust is clogged up and in case of dehumidifier with pump (optional), there is a malfunctioning in the water discharge system. When the warning light comes on the dehumidifier does not work, reset the appliance to restart it.
- 5.5. REMOTE HUMIDISTAT SOCKET (5): If a remote humidistat is connected to the socket, the relative humidity you wish to achieve in the room may be controlled remotely.
- 5.6. VOLTAGE CHANGE SWITCH (6) (where present): In dual voltage models (...DV), the dehumidifier operating voltage may be set to suit the voltage supplied by the electricity mains.

## ►► 6. SWITCH-ON

**IMPORTANT:** In dual voltage models (...DV), check:  
 ► 1-POSITION OF THE VOLTAGE CHANGE SWITCH (220-240V / 110-120V) (Fig. 5); If the set voltage does not match that supplied by the mains, the voltage must be adapted. Loosen the two screws fastening the cover (Fig. 6), move/press the switch on the supplied voltage value (Fig. 7) and refit the cover (Fig. 8).

► 2-CHECK THE TYPE OF SOCKET; If the type of socket does not match the power supply features, a suitable adapter must be fitted.

IF THE VOLTAGE CHANGE SWITCH POSITION, THE TYPE OF SOCKET AND THE POWER SUPPLY ARE CONSISTENT, YOU MAY PROCEED WITH THE SWITCH ON SEQUENCE.

**IMPORTANT:** In dual voltage models (...DV), in the case you need to use a transformer 240V / 110V we suggest you to choose minimum power 2.000VA. You must use power cord extension with correct dimension (1,5mm<sup>2</sup> up to 10m, 2,5mm<sup>2</sup> up to 20m and 4mm<sup>2</sup> over 20m) and provided with ground connection.

In order to start up the dehumidifier, it must have remained in vertical position (normal use position) for at least eight hours. Failure to comply with this rule may cause irreparable damage to the dehumidifier.

- 6.1. Follow all the safety instructions;
- 6.2. Connect the supply plug to the power mains (Fig. 9) (SEE VOLTAGE IN THE "TECHNICAL DATA TABLE");
- 6.3. Turn the humidistat (1 Fig. 4) on the desired relative humidity value, the dehumidifier will start automatically. Thanks to the "VENTILATION SPEED" selector (3 Fig. 4), the dehumidifier may be operated at the maximum air flow or at an intermediate air flow depending on the need, in order to achieve the utmost comfort in the room.

## ►► 7. SWITCH-OFF

Proceed as follows to switch off the dehumidifier:

- 7.1. Turn the humidistat (1 Fig. 4) to "OFF";
- 7.2. Disconnect the supply plug from the power mains with dehumidifier off (Fig. 10).

## ►► 8. REMOTE HUMIDISTAT CONNECTION

For remote humidistat ready models (5 Fig. 4), remove the cover connected to the dehumidifier and connect

the remote humidistat (optional) (Fig. 11). For correct dehumidifier operation, completely rotate the knob of the humidistat on the control panel (1 Fig. 4) to "CONT" and set the desired humidity on the remote humidistat.

## ►► 9. IF THE DEHUMIDIFIER DOES NOT START OR DOES NOT DEHUMIDIFY

If the "ALARM LIGHT" (4 Fig. 4) switches on, this means that the water recovery tank is full and/or there is pump malfunctioning (optional), just empty the tank and/or reset the pump. Should the problem persist, contact the authorised technical service centre.

## ►► 10. CONNECTION TO DISCHARGE PIPING

This dehumidifier allows for the option to directly connect the appliance to a fixed discharge pipe.

► 10.1. IN THE STANDARD CASE OF DEHUMIDIFIER WITH TANK: The tank has a fitting which may be connected to a pipe with 16mm internal diameter. Before connecting the pipe, remove the screw/cover (where present) (Fig. 12) and check fitting cleanliness, in order to avoid possible obstructions.

► 10.2. IN CASE OF DEHUMIDIFIER WITH PUMP (OPTIONAL): A water drain pump (optional) may be installed onto the dehumidifier (Fig. 13). Connection is easy and straightforward, thanks to the specific electrical connector and the hydraulic fitting located at the rear, which can be connected to a pipe with 16mm internal diameter. Before connecting the pipe, remove the screw/cover (where present) (Fig. 14) and check fitting cleanliness, in order to avoid possible obstructions. ALL INSTRUCTIONS AND DETAILS FOR INSTALLATION ARE SUPPLIED IN THE PUMP KIT.

## ►► 11. PERIODIC MAINTENANCE

The only maintenance to be performed regularly is filter cleaning (Fig. 15). Cleaning must be performed by removing the filter from the front of the dehumidifier (Fig. 16) and placing it under the water tap in an ordinary sink. This must be performed on average every month; in the event of use in very dusty environments cleaning must be more frequent.

Depending on use, cleaning of the finned coil may be required, with a low pressure water jet. Before performing washing it is strictly required to disconnect the supply plug from the power mains (Fig. 10). To perform washing follow the below steps (Fig. 17-18):

- 11.1. Remove the screw that secure the cover to the dehumidifier (1);
- 11.2. Rotate the cover (2);
- 11.3. Remove the four screws and remove the protection from the finned coil (3). (Wash the finned coil with a low pressure water, paying attention not to wet the electrical panel. WATER MUST ONLY FLOW FROM THE TOP DOWN);
- 11.4. Install the protection and the two screws (4);
- 11.5. Rotate the cover to bring it back to a vertical position (5);
- 11.6. Install the screw than secures the cover to the dehumidifier (6).

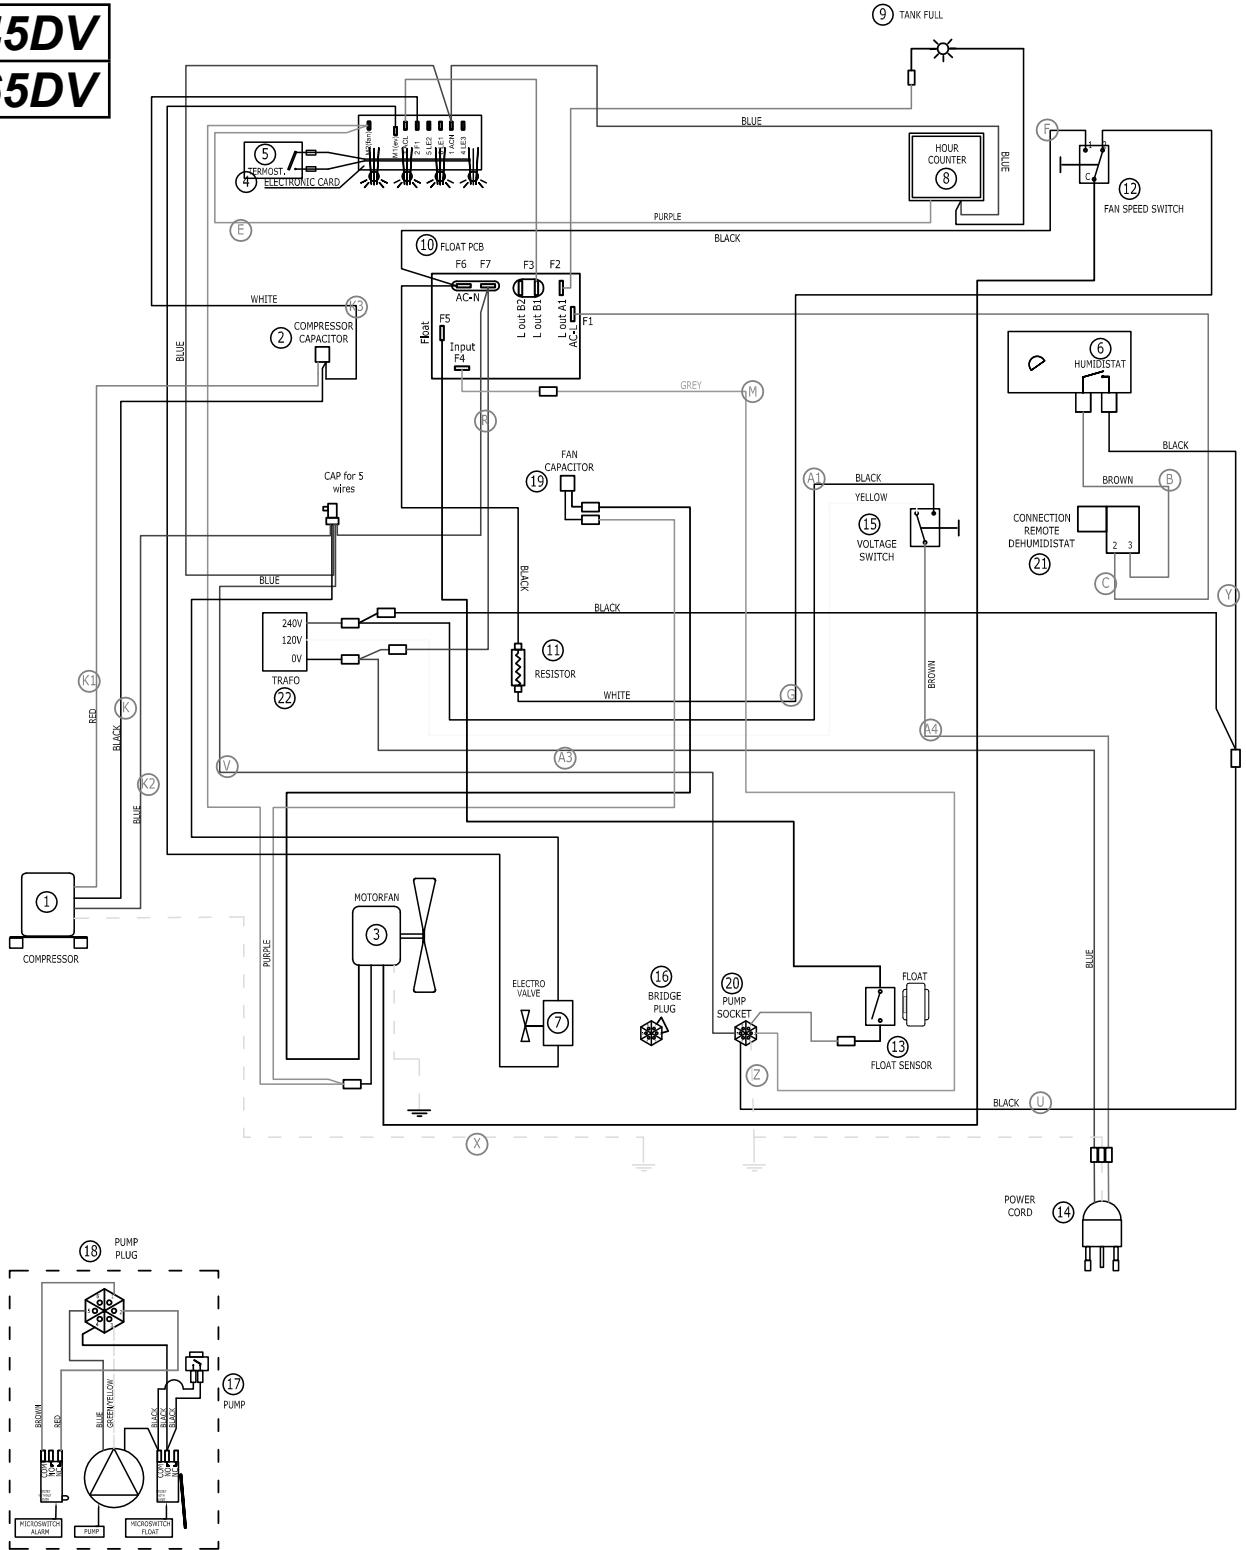

Before restarting the dehumidifier, ensure the electrical parts are not wet and/or moist, in normal conditions at least eight hours must elapse. This cleaning operation improves the dehumidifier performance and assures its long life.

#### ► en - DISPOSAL OF THE PRODUCT

- This product has been designed and manufactured with top-quality materials and components, which can be re-cycled and re-used.
- When a crossed-wheely bin symbol is attached to the product, it means that the product is protected by the, 2012/19/UE European Directive.
- Please obtain information regarding the local differentiated collection system for electrical and electronic products.
- Respect local Standards in force and do not dispose of old products as normal domestic waste. Correct disposal of the product helps to prevent possible negative consequences for health, the environment and mankind.

#### ► it - SMALTIMENTO DEL PRODOTTO

- Questo prodotto è stato progettato e fabbricato con materiali e componenti di alta qualità, che possono essere riciclati e riutilizzati.
- Quando ad un prodotto è attaccato il simbolo del bidone con le ruote segnato da una croce, significa che il prodotto è tutelato dalla Direttiva Europea 2012/19/UE.
- Si prega di informarsi in merito al sistema locale di raccolta differenziata per i prodotti elettrici ed elettronici.
- Rispettare le norme locali in vigore e non smaltire i prodotti vecchi nei normali rifiuti domestici. Il corretto smaltimento del prodotto aiuta ad evitare possibili conseguenze negative per la salute dell'ambiente e dell'uomo.

#### ► de - ENTSORGUNG DES PRODUKTS

- Dieses Produkt wurde unter Verwendung von Qualitätsmaterialien und -bauteilen entwickelt und hergestellt, die recycelt und wieder verwendet werden können.
- Ist ein Produkt gekennzeichnet durch die Mülltonne mit Rädern und einem Kreuz, wird hier angezeigt, dass dieses Produkt durch die europäische Direktive 2012/19/UE überwacht ist.
- Es wird gebeten, sich über die vor Ort bestehende Mülltrennung bezüglich elektrischer und elektronischer Produkte zu informieren.
- Die vor Ort geltenden Vorschriften zur Müllentsorgung müssen eingehalten werden und alte Produkte dürfen nicht zusammen mit dem Hausmüll entsorgt werden. Die ordnungsgemäße Entsorgung des Produkts hilft mögliche negative Folgen für Gesundheit und Umwelt zu vermeiden.

#### ► es - ELIMINACIÓN DEL PRODUCTO

- Este producto ha sido diseñado y fabricado con materiales y componentes de alta calidad que se pueden reciclar y reutilizar.
- Cuando en el producto se encuentra el símbolo del contenedor con las ruedas tachado con una cruz, significa que el producto está tutelado por la Directiva europea 2012/19/UE.
- Se ruega informarse acerca del sistema local de recogida selectiva para los productos eléctricos y electrónicos.
- Respete las normas locales vigentes y no elimine los productos viejos junto con los residuos domésticos normales. La eliminación correcta del producto ayuda a evitar posibles consecuencias negativas para la salud del ambiente y del hombre.

#### ► fr - SE DÉBARRASSER DE VOTRE PRODUIT USAGÉ

- Ce produit a été conçu et fabriqué avec des matériaux et des composants de haute qualité, qui peuvent être recyclés et utilisés de nouveau.
- Lorsque le symbole d'une poubelle à roue barrée est appliqué à un produit, cela signifie que le produit est couvert par la Directive Européenne 2012/19/UE.
- Veuillez vous informer du système local de séparation des déchets électriques et électroniques.
- Veuillez agir selon les règles locales et ne pas jeter vos produits usagés avec les déchets domestiques usuels. Jeter correctement votre produit usagé aidera à prévenir les conséquences négatives potentielles contre l'environnement et la santé humaine.

#### ► nl - VERWIJDERING VAN HET PRODUCT

- Dit product werd ontworpen en gemaakt met hoogwaardige materialen en componenten, die gerecycleerd en herbruikt kunnen worden.
- Wanneer op een product het symbool van de afvalbak op wielen met een kruis erdoor is aangebracht, betekent dit dat het product valt onder de Europese Richtlijn 2012/19/UE.
- Gelieve inlichtingen in te winnen betreffende het plaatselijke systeem voor gedifferentieerde inzameling van elektrische en elektronische toestellen.
- Respecteer de plaatselijke normen die van kracht zijn, en verwijder de oude toestellen niet als gewoon huishoudelijk afval. Een correcte verwijdering van het product helpt om mogelijke negatieve gevolgen voor de gezondheid van mens en milieu te voorkomen.

#### ► pt - ELIMINAÇÃO DO PRODUTO

- Este produto foi projetado e fabricado com materiais e componentes de alta qualidade que podem ser reciclados e reutilizados.
- Quando for afixado em um produto o símbolo do bidão com rodas marcado com uma cruz, significa que o produto é protegido pela Diretiva Europeia 2012/19/UE.
- Solicitamos informar-se sobre o sistema local de recolha diferenciada para os produtos eléctricos e eletrónicos.
- Respeitar as normas locais em vigor e não eliminar os produtos antigos como normais detritos domésticos. A correta eliminação do produto ajuda a evitar possíveis consequências negativas para a saúde do ambiente e do homem.
