

Installation And User Instructions

All electrical installations should be carried out in accordance with the latest edition of the Institute of Electrical Engineers regulations.

Do not use this heater in the immediate surroundings of a bath, shower, swimming bath or similar surroundings.

The heater must not be located immediately below a socket-outlet or within 250mm of any trunking.

The fireguard of this heater is intended to prevent direct access to the heating elements, therefore should not be permanently removed. However, the fireguard does not give full protection for young children and for aged or infirm persons.

This heater should be protected by an external fuse the rating of which is on the Rating Label fitted to the side of the appliance.

Do not use this heater with a programmer, timer, separate remote-control system or any other device that switches the heater on automatically, since a fire risk exists if the heater is covered or positioned incorrectly.

Disconnect power from the supply before cleaning or moving the heater. Allow sufficient time for the heater to cool before transporting or storing away.

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Children should not be left along unsupervised when in the vicinity of the heater.

This heater should only be operated by a competent adult. Do not use while you are tired or under the influence of drugs, alcohol or medication.

Fire risk exists if this heater is coverd by or positioned close to curtains or other combustible materials. Always keep heater at least one metre (1m) from combustible materials.

It is advised that you should not use an extension lead unless absolutely necessary. If you have to use an extension lead it must be 4MM, 3 core cable, please check with a qualified electrician regarding the maximum length allowable.

WARNING: This heater is not equipped with a device to control the room temperature.

CAUTION – Some parts of this product can become very hot and could cause burns. Particular attention has to be given where children and vulnerable people are present

WARNING: In order to avoid overheating and a potential fire risk, do not cover the heater.
