

Description:

The Master SF3 can be used in many applications such as Public Spaces, Offices, Onsite Accommodation & Welfare Units, Vehicles & Plant, Hotels, Restaurants and Schools, public transport, workplaces and warehouse facilities.

It is recommended that any chemicals used in the disinfection or sterilization process are as Eco Friendly and Biodegradable as possible to protect the environment and anyone coming into direct contact with any surfaces that have been sprayed.

Specification:

- Spray disinfectant to sterilise work surfaces
- Lightweight, portable, and ergonomically designed for comfortable use all day
- Rapid diffusion of liquid for maximum coverage. Accepts oil and water-based disinfectants
- Easy to use and offering quick adjustment of both spray volume and particle size. Flow rate 150 -260 ml/m and 10 to 150 micron
- Highly efficient nozzle design ensures droplets are suspended in the air longer ensuring improved distribution for a more effective clean
- Power input: 1400 Watt via 5-meter mains cable fitted with a BS1363 plug
- Optimum 4.5 litre tank capacity for user comfort without compromised runtimes
- Weight: 3kg
- Dimensions: 49.5 x 26 x 42.5 cm (LxWxD)

Tank 4.5 ltr

1400W

240V

8-10 mtrs
